

AST-VSR
VGA-RCA + SVIDEO CABLE 15CM

Description:

If your video card or controller supports TV-out function, you can use this cable adapter to connect your PC's VGA port and your TV's S-Video or RCA-composite port.

*****PLEASE NOTE*****

This cable does not add TV-output functionality. If your video card/controller doesn't already have this function, this cable WILL NOT WORK for connecting your VGA output to a TV input.

Sometimes you will see "TV-OUT" printed near the port, but check your motherboard or video card documentation to be certain that your VGA port supports TV-out signal capability before purchasing!
