

LKOT-2009 KEY SAFE LOCK

Description:

Storage padlock for key safe - Open it up and place your keys inside.

The storage padlock is a safer and more secure alternative to leaving keys and valuable objects under a rock, vehicle, doormat or “hidden” somewhere else.

It is popular with outdoor and water activities and is widely used in business for real estate agents, car dealers, on construction sites and factory management.

It is built of weather-resistant cast steel, finished with baked paint and uses a four-digit dial to set your own combination.

Size of lock: 190mm x 75mm x 42mm. Measurements of shackle: 10mm. Weight: 700 grams.
